

Log-in and Password Tips

You will usually have a **different** log-in and password for each email address and website you use for job searching. Write them down and put them somewhere safe! Keep them in your wallet, a notebook only you can see, or text them to your phone with the **name** of the account. **Treat these like cash!** (They will help you get cash in the long run.) Keep them **safe** and where you **can find them**.

Maryland Workforce Exchange
